Simen Herland | *Full-Stack Developer*

simenmelo@gmail.com simenmh.com /simen-herland /SimenMH Bergen, Norway

SKILLS

Javascript | Typescript | HTML / CSS | React | SASS | Flutter | C# | .NET | Cloud Development | DevOps | NodeJS | Express | MySQL | MongoDB | REST APIs | Python | Git

EXPERIENCE

Software Engineer, *Knowit Experience* Aug 2022 – present
Saferoad Bergen, Norway

- Developed and maintained frontend features in Umbraco CMS using C#, JavaScript, and Tailwind CSS.
- Implemented new content blocks and layout adjustments based on customer feedback.
- Optimized templates and components to improve efficiency, maintainability, and user experience.
- Mentored junior developers and supported them through the onboarding process.

IKM Customer Portal

- Built a React frontend for a new customer portal, replacing a legacy system and improving usability and performance.
- Implemented user management features, including two-factor authentication.
- Led layout and design decisions in the absence of a UX designer, ensuring a consistent and intuitive interface.

NAVTOR AS

- Rebuilt the company's mobile app in Flutter with a modern design.
- Developed an interactive Mapbox map showing live vessel positions, optimized for thousands of vessels.

Universitet i Bergen

- Implemented a new portal design for UiBtreet using React and Material UI.
- Built a fully functional demo version with automatically generated, anonymized dummy data

Fjordkraft

- Developed and maintained web and mobile apps using C#, React, SCSS, and Azure Cloud.
- Implemented security improvements and enhanced project monitoring.
- Automated CI/CD processes with Azure Pipelines, streamlining build, test, and deployment workflows.

PROJECTS

Boggdle, *Online word game* 2024

- Developed and launched "Boggdle," a word game inspired by Boggle and Wordle, where players identify up to three words from a grid of letters.
- Implemented using React for the frontend, NodeJS for the backend, and MongoDB for data storage and retrieval.
- Designed daily board releases at midnight UTC, integrating statistical tracking of average and highest scores, popular word selections, and optimal solutions.
- Available to play on simenmh.com/boggdle

Bucketflix, *Web application* 2022

- Developed a user-friendly website for helping users keeping track of movies and TV-series they are currently watching or want to watch
- Allows users to invite friends to collaborate on lists for movies or series they are watching together
- Built with TypeScript, React, Redux, NodeJS, SCSS, hosted on a VPS
- Available on www.bucketflix.com and github.com/SimenMH/bucketflix
- For demoing the website, login with **email**: test@test / **password**: test
